

Sustainable Oneness
Amplify the Field: Love. Honor. Appreciate.

April 10, 2014

The following writing came through in early January after receiving inner guidance that I was to allow a message from the Star Elders to flow through me to the world at large. As I received this inner prompting, I saw and felt myself sharing it with the world at large, and as a pdf file for those who wished to pass it along. It took me another few months to muster the courage to share it in the way that these Star Elders intended.

With this introduction, here is the channeled message that follows:

Open letter to the Indigenous Elders of the Earth Kingdoms

There comes a time in our collective calling, a time when the heart of who we are speaks to the way of this now moment.

The earth is dying.

We appeal to you to open your heart, as a collective force in this world, and allow the Star Beings to be heard, through the purity of heart, of all beings everywhere.

This is the message of the Star Beings who govern this sector of the galaxy of light.

They are the gatekeepers of consciousness, those bearers of light between the earth world and all other worlds:

Your people are dying.

The earth people are dying from environmental toxins spitted and spewed from your industrial machine-like way of conquering and enslaving the plant, animal, and mineral kingdoms.

It will not get better without intervention.

An injection of light is needed.

Through this channel, we wish for you to consider:

~ You are the stewards of the earth and all her kingdoms.

~ You are the flowers that bloom after the storms have come and gone.

~ You are the keepers of the records, the purveyors of light.

The portals of light have been opened between our world and yours.

There is to be a time of the great turning.
We travel to you, and offer our help and assistance.

The earth's stratosphere mirrors that great cosmic shift of the ages.
It is time to rebalance and harmonize the earth and her children.

We wish to deliver a vision:

There shall be 32 Centers of Light positioned upon the land.
This is land has been honored by the record keepers of time.

These Centers are to honor the land as they are built upon sacred geometrical energetic grids lines designed to balance and harmonize the whole.

The ancient sacred temples were built by those who came before you for this express purpose.

Some of these temples are being reactivated, but not all.
We are in a different time - space continuum.

You shall walk softly upon the land.

These Centers are to be built on sacred land but the land is not to be purchased or gifted.

The buildings shall house individuals whose express purpose is to anchor light.

Commerce shall take place that most honors the earth by the indigenous who know only appreciation for their contribution.

The reciprocity shall be the healing of the earth's waterways and the eradication of environmental toxins.

The prosperity flowing into the indigenous communities of light shall flow outward into the world at large then inward for the sacred honoring of all people everywhere.

Through sacred ceremony, dance and with pure intention, balance and harmony shall be restored.

We bring you this vision and are guided to share it with you. If you feel this in your heart to be true, we welcome a conversation through an invitation to meet with you face to face so that you may see what is in our hearts as the wave carriers of this global vision and mission.

With humble and grateful hearts, we are

Living the Miracle

Building Sustainable Oneness
