

Pallet & Carton Security

PalletLock

Securing pallets, tote boxes and other containers of high value goods on domestic long-distance and international transit.

Features:

- Designed to be applied to the generic plastic band on a pallet.
- User friendly; no special tools are required to use the kit, apart from the standard tensioner and crimper.
- Random numbering for every component of the kit; cross locking mechanism; plastic security seal and security label

Benefits:

- Enhanced security level
- Cargo remains more secure than with any other sealing technique for a pallet
- Attempt to tamper with the PalletLock would be visually easy to recognise

Components:

- Cross Shape Locking Mechanism with its own Self Void Label.
- Plastic security seal that has a metal non reversing plate insert.
- Self Void security label which provides a space to record the numbers of both the Locking Mechanism and Plastic Seal.

Tamper Tapes and Labels

Tamper evident adhesive tapes and labels, reveal clearly visible security message if removed

SecureTape

- Tamper evident continual tape for pallets and cartons
- Total transfer - leaves the security message adhesive film on the applied surface
- Clearly visible security message upon peeling of label
- A sequential serial number
- Tear off sections every 150mm
- Size: 66m L x 45mm W
- Pack Qty: 1

KertasLock™

- Clearly visible security message upon peeling of label
- Three types available for different applications:
Non-transfer - leaves no residue on applied surface
Partial transfer - leaves easily removable void message residue on the applied surface
Total transfer - leaves the security message adhesive film on the applied surface
- Comes in two standard sizes and can be customised
- The matt polyester surface allows for writing by normal ballpoint pens.
