

# Active Lifters

Client still active, able to stand and weight bear

## etac Turner Pro

Etac Turner PRO is a turn aid with a functional design that offers support for safe patient turning in standing.

Many grip possibilities for both carer and user.

Encourages natural standing with anterior support and carer assisted turning. The only adjustment necessary is the height of the leg support and the handle. The transfer can then be performed safely whilst the caregiver and user maintain eye contact and communication.

The small footplate makes it the perfect choice of transfer aid when transferring in tight spaces.

Etac Turner PRO is easy to transport at only 7.5 kg.

## molift<sup>®</sup> Raiser

The ergonomic platform for a safe assisted sit-to-stand and small distance transfer.

Molift Raiser is stable and easy to manoeuvre. It is ideal in confined spaces and for short transfers, such as between beds, wheelchairs/shower chairs and in toilets.

## molift<sup>®</sup> Quick Raiser 205

Electric

An ergonomic sit to stand hoist with outstanding lifting capacity

The Quick Raiser 205 mimics the natural pattern of sit to stand. It has an electrically adjustable leg base and an outstanding lifting capacity of 205 kg. The unique wheel position, angled push bar and the extraordinary weight distribution of the base provides a small turning radius and easy manoeuvrability even in very narrow spaces.

### RgoSling Active

The Active Lifting Arm (4-point sling bar) and the RgoSling Active provides extra support when hoisting from sit to stand. Provides a natural position users prefer.
