

# Clematis 'Radar Love'

- ✿ Easily grown clematis with bright yellow bell shaped flowers that appear throughout the summer followed by the feathery tufted seed heads. Great climbing vine, can quickly climb up to 15 feet and also can be used as an excellent ground cover for difficult areas with poor soil
- ✿ Not fussy at all as to soil type. Plants may be pruned back to about 6 inches in the spring every few years to renew growth , or whenever the vines become bare at the base

**Height: 15 Feet**
