

Shenandoah Switch Grass

Panicum Virgatum 'Shenandoah'

- ❁ The reddest of the switch grasses and also the most compact. The foliage has a lovely, dark purple cast on its tips throughout the summer, but when fall hits, you won't even notice the nice airy plumes because of the dark, black-purple foliage!
- ❁ Provides a good vertical accent in borders and is also effective en masse. This clumping grass provides excellent food and shelter for songbirds and upland game birds
- ❁ Leave foliage in place over winter for interest. Cut back to the ground before new growth appears in spring

Height: 3-4 Feet
