## **IQMS presents EnterpriseIQ ERP at the 5<sup>th</sup> ERP Vendor Shootout™**

**An event for mid-sized companies with manufacturing, distribution, and project-oriented requirements to determine “short list” when evaluating Enterprise Resource Planning (ERP) Software**

**GREENSBORO, NC – August 3, 2009** – [IQMS](http://www.iqms.com) will be participating in a side by side comparison of the [EnterpriseIQ ERP](http://www.erpshootout.com) with their toughest competitors in the ERP Vendor Shootout in Baltimore, MD on September 23-25, 2009. The World’s Top Enterprise Resource Planning (ERP) solutions will be presented, giving companies who are looking to replace their ERP system a quick and less costly method to develop a short list of vendors.

The targeted audience for this event is mid-sized manufacturing, distribution and project-oriented companies who are considering an ERP software selection or upgrade.

Technology Evaluation Centers (TEC) of Montreal, Canada will serve as the moderator of the event and each of the ERP packages will be represented by an official Value Added Reseller within the region.

The goal of the event is to simplify the ERP software selection process. This event alleviates some of the painful inefficiencies of the selection process by coordinating onsite software presentations and delivering them in a one and a half day event. End-user attendees will participate in a series of scripted demos from resellers, gaining a side-by-side, comparative view of product functionality, user interfaces, and overall usability. The event will also feature a networking cocktail hour to conclude the day.

For additional information or to register for the ERP Vendor Shootout™ visit [www.erpshootout.com](http://www.erpshootout.com) or call **877.907.2702**.

**About IQMS:** IQMS, a leader in enterprise resource planning software and maker of the industry's only single-source software solution, provides manufacturers with all the functionality to efficiently manage and improve business processes. The company's flagship product, EnterpriseIQ, intuitively combines real-time manufacturing, accounting, and supply chain management into one database. IQMS provides business and plant management software that allows manufacturers to run more effectively and more profitably.

IQMS has been a pioneer in the design and development of ERP software systems for repetitive, process and discrete manufacturing industries since 1989. IQMS provides product development, support, implementation and training. EnterpriseIQ also offers features such as quality control, CRM, and eBusiness solutions designed for the automotive, medical, appliance, construction, house wares and other industries.
