

# 2018-2019 GOVERNOR'S AWARDS OF EXCELLENCE

## SPONSORED BY NIFA

The Governor's Awards of Excellence, sponsored by NIFA, recognizes outstanding projects and activities of agricultural education programs and FFA chapter in Nebraska.

The award application includes a detailed written plan of completion from chapter to apply for an award in one of two categories: \$2,500 or \$1,000. Four, \$2,500 awards and fifteen \$1,000 awards are available.

The awards are to encourage programs and chapters to develop programming that engages students in solving problems beyond those that exist today. Students are encouraged to apply technology and scientific principles as well as increase agricultural knowledge through student, chapter and community development activities.

Priorities for funding of eligible activities will be place on plans that directly and significantly work to solve problems through the use of science, technology and communication.

### **There are five "topical" categories for chapters to explore. They are:**

1. The future of agriculture- Literacy, awareness or practices that promote a safe food supply.
2. Exploration and promotion of agricultural career opportunities.
3. SAE development with focus on entrepreneurship and Agriscience areas of SAE.
4. International agriculture brought to our community.
5. Developing leaders as problem solvers within the agriculture industry.

### **Overall goals of these awards include:**

1. Develop skills which propel chapter members to remain involved in agriculture through education and future career opportunities.
2. Recognize the roles science and technology play in the agriculture industry.
3. Plan and complete projects that solve problems to impact the chapter and community.
4. Develop the science, technology and communication skills of students.

### **Award money may be used for purposes that align with the goals of the award program.**

#### **Examples include, but are not limited to:**

1. Equipment (computers, software, ultrasound monitors, digital scales, micro labs, etc)
2. Training (student participating in learning how to use equipment or participation in a career exploration experience which might include money to support a student internship that can part of a student's SAE. The student would need to share experiences with chapter, community, etc)
3. Resources and Materials (supplies for research, instructional materials, setting up a research lab, etc)
4. Topical Category (activities that promote literacy, awareness or actual practices that ensure a safe food supply for our state, nation; develop entrepreneurship and

- Agriscience areas of SAE; explore international agriculture; explore world/activities that explore and promote agricultural careers)
5. Efforts and work that solves problems and addresses needs of communities.

**Chapters applying must submit a thorough and complete project outline through the Program of Activities on the Agricultural Experience Tracker (AET).** It must include a detailed outline of the project, budget, how the project will be promoted and a timeline including start and end dates. **Applications are due on September 30, 2018 with notification in October.**

Projects must be completed prior to March 1, 2019. Chapters will be recognized as award recipients during the state convention in the spring.

In addition to submitting the activity plan through the AET, please complete the short application form [found using this link](#).

A form will be provided for winning chapter to complete at the conclusion of the project.
