Interop Results Legend

Success	Message was sent, requested MDN was received, and recipient confirmed message was readable (by resp
Partial Succe	
	Not Success or Failure, e.g. sender receives a notification in response, but either it is not properly formed
Failure	Message could not be sent, or permanent failure message/DSN/bounce received.
Dnrl	
No test Results	New Bundle Member and/or no test information available
Stale Data	Data more than 6 months old

Notes & Action Items:

1. Processed MDN not received
2. Out of band received and readable confirmation not yet available
3. Certificate expired
4. Certificate revoked
6. Unsolicited Dispatched MDN received
7. Processed MDN not received when CCDA payload attached
13. Dispatched MDN not received when requested
18. Message Digest Issue in sent message preventing trust validation
27. Could not determine revocation status
30. Message contained additional stray content not expected.
