
Platinum Global Dividend Fund Recognised at Investors Choice Awards

London, 28 March, 2014 - Platinum Capital Management Ltd, the global investment firm, this week saw one of its leading strategies, the Platinum Global Dividend Fund, recognised at the HedgePo Investors Choice Hedge Fund Awards 2014.

The event, held at the Dorchester Hotel and attended by over 300 people, including 150 investors; saw the Platinum Global Dividend Fund shortlisted by a range of industry participants for Global Equity Fund of 2013 an important endorsement of Platinum's standing in the industry.

Platinum Global Dividend Fund seeks to combine high-quality dividend income with capital appreciation to outperform traditional equity investments and deliver consistent total returns with less risk and generous quarterly cash dividends. The strategy emphasises global leading equities for whom dividends reflect strength of business. These global leading equities are selected through a combination of quantitative screening of defined financial parameters and rigorous qualitative analysis of each individual company's strategic positioning and management - the aim is to target companies displaying an optimal combination of catalysts for share price performance with robust core business operations and compelling valuation. The Fund may also sell short or hedge as appropriate as part of active portfolio management. A UCITS compliant share class is also available.

Peter Sprecher, Founder and Chairman of Platinum Capital Management, commented: "After our strong showing in 2013, it is gratifying for Platinum Global Dividend to be recognised by a panel of investors and allocators as a leading performer in the highly competitive Global Equity space. This is a fitting overture to Platinum's upcoming 15th Annual Institutional Investor Conference."
