

# Printable Measuring Tape

## How to assemble the measuring tape

1. Print the measuring tape
2. Cut along solid lines in between rows
3. Use the clear tape to attach the correct pieces together in numerical order  
(Example: Attach end black line of 10 with beginning black line of 11, attach end black line of 20 with beginning black line of 21, etc.)
4. After you have put together your measuring tape use a ruler to check the accuracy of the tape length. You want to make sure you are getting a true measurement. Once you have done this your tape measure is ready to use.

**IMPORTANT:** How to print it in REAL SIZE. In the Print dialog box **DO NOT CHECK** "Fit to page" or "Shrink oversized pages to paper size". Be sure either is *NOT checked*. If you have: Acrobat Reader 6 or 7 make sure that "None" is selected in the drop down list next to "Page Scaling".
