

Executive Clicker

Drill Bit required –9.5mm

Bushings required – Bushing - Executive Clicker (A0207)

1. Place the blank on the mandrel with the bushes in each end.
2. Turn the blank to the top diameter of the bushes.
3. Finish the blank with your choice of finish.
4. Layout the parts as shown below.
5. Press the nib on the brass tube.
6. Insert the clip onto the click mechanism.
7. Slide the Press Tool over the Click Mechanism (clicking end) and press the click Mechanism into the Brass Tube.
8. Unscrew the nib and slide the refill into the pen from the writing end and then screw the writing tip back together to complete the pen.
