

Rose 'Campfire'

Rosa x 'Campfire'

The 20-petal flowers begin as shapely buds with yellow and red tones, opening to yellow, edged in a deep rosy pink. Some blooms that appear in the early season will be nearly all yellow, gradually developing pink edging. As the season progresses the pink edging becomes more prominent. Some flowers will be nearly all pink and some nearly all yellow. As autumn approaches, the blooms tend to be yellow in bud, quickly turning soft pink, creating an unusual, stunning, visual effect. Fragrant, continuous bloomer, exceptional disease resistance
