

Golden Barberry

Berberis Tunbergii 'Aurea'

- ❁ Striking golden yellow foliage provides fresh colour contrast in the landscape. The small oval leaves turn green by late summer followed by an outstanding red in the fall. Clusters of yellow flowers hang from the branches in spring.
- ❁ Sharp needles will keep any interlopers out
- ❁ One of the most effective foliage plants, it tolerates shearing, making it a good choice for a hedge or topiary

Height: 3 Feet
