

French Pussy Willow

a.k.a 'Goat Willow'

Salix Caprea

- ❁ Giant 4 inch silvery-pink catkins in early spring before the leaves appear are used extensively in floral arrangements
- ❁ Grows into a large shrub/small tree but if you cut back the branches for floral decorations it is easily kept more manageable
- ❁ This is one of the larger willows not associated with water although it tolerates wet conditions, its natural habitat is woodland edges and lowlands
