

'Little Goblin Red' Winterberry

Ilex Verticillata 'NCIV1'

- ❁ This female selection produces copious amounts of extra-large red berries. Smaller habit makes it much more landscape-friendly than other winterberry hollies. In order to get fruit, you will need to plant a male plant (Little Goblin Guy) for pollination within 25 feet of the female
- ❁ Dark green foliage turns yellow / purple in fall
- ❁ Will also grow in moist soils and is deer resistant

Height: 2-3 Feet

Zone: 4
