

'Karl Forester'

Feather Reed Grass

Calamagrostis x 'Karl Foerster'

- ❁ A Ideal for accent or background plantings with its erect narrow habit. Spikes are reddish brown in spring and drying to golden and finally to buff in the winter
- ❁ Feather reed grasses are attractive clump forming grasses which are very upright in nature. They have showy summer plumes and wonderful winter seed heads. This cool season grass is one of the earliest ornamental grasses to come up in the spring
